I SUPPORT BUILDING BIG SOLAR HERE IN AUSTRALIA!

Australia is one of the sunniest countries in the world, and the sun is a great source of power that is clean, safe and will never run out. But while other countries are racing ahead with large scale solar plants, Australia has yet to get started.

With a new $10 billion fund on the table it's time Australia got serious about building big solar across our nation!

By signing up below you'll be connecting with thousands of others who are working in their communities and online to tell our leaders we want a big, bright solar future for Australia.

Help us reach our goal of 10,000 supporters by signing up now...
