

WHERE DO THE POLITICAL PARTIES STAND ON RENEWABLE ENERGY?

This election, vote for the party who is most committed to a future powered by renewable energy. Let's make sure that no matter who wins this election, renewable energy wins as well.

Parties with one or more MPs in the current parliament are included: for details of other parties visit www.solarscorecard.org.au/party-scorecards

SOLAR SCORECARD

MAKE YOUR VOTE COUNT FOR RENEWABLE ENERGY THIS ELECTION

Solar energy is on the agenda this election year. With over one million solar homes across the country, Australians are turning to the sun to generate power from clean, safe sources of energy. And with a natural resource like the sun so abundantly available, why wouldn't we?!

Community organisation 100% Renewable, has developed this Solar Scorecard so you can see where your candidates for this Federal election stand on the most important priorities for renewable energy.

OUR SCORECARD CRITERIA – HOW ARE SUNS ALLOCATED More information at www.solarscorecard.org.au/howscoringworks

SOLAR PLEDGE

The politician has signed our pledge to support households and businesses to go solar and to help continue the growth of Australia's solar industry.

BUILD BIG SOLAR

The politician or their party has made a statement in support of building Australia's first big solar thermal power station and they support the fund that could finance this project, the Clean Energy Finance Corporation (CEFC).

RENEWABLE ENERGY TARGET

The politician or their party publicly supports the existing fixed RET for 20% of our energy in 2020 to come from renewable sources.

EXPANDED TARGET

The politician or their party has made a public statement in support of an expanded Renewable Energy Target of at least 50% by 2030.

RENEWABLE FUNDING

The politician or their party publicly support the Australian Renewable Energy Agency (ARENA), a \$3 billion renewable energy funding body.

CARBON PRICE

The politician or their party supports keeping or strengthening the current price on carbon, which has seen Australia pollution fall by 7% and a greater proportion of our energy mix come from renewable sources.

COMMUNITY ENERGY

The politician or their party has a policy to establish a new \$50 million Community Renewable Fund to assist communities across Australia achieve their dream of owning and operating their own local renewable energy project.

WILDCARD!

We've seen evidence that the politician is either doing great things to support solar in Australia (or terrible things to block it!) that are not included in our scorecard.
